Portfolio

Profile

Software Engineering student specializing in AI Engineering, with hands-on experience building LLM, RAG, agentic AI, and machine learning systems. Experienced in Python, PyTorch, FastAPI, and applied ML, with a strong competitive programming background. Seeking an AI/ML Engineering internship to build production-oriented AI systems.

Education

Software Engineer, National Engineering School of Tunis	2024 – Present
Preparatory classes in Mathematics and Physics, IPEIM	2022 – 2024

Professional Experience

AI Engineering Intern, TechNet World	07/2026 – 08/2026
- Built an agentic AI workflow using LLMs to translate natural-language business rules into structured Boolean expressions. - Implemented structured prompting, contextual retrieval, and schema-based output validation to improve reliability. - Integrated Z3-based logical validation to detect conflicting and inconsistent business rules.	

Projects

AI-Powered Career Assistant Platform (AuraHire)
- Built a full-stack AI career platform using FastAPI for job discovery, profile analysis, interview preparation, and review generation. - Developed a RAG pipeline with vector-based semantic search for context-aware responses. - Designed modular REST APIs with JWT authentication and containerized the application using Docker.
AI Codeforces Performance Predictor
- Built a machine learning system to predict Codeforces contest performance using historical user and contest data. - Developed personalized problem recommendations using Codeforces API data and user performance patterns.

Skills

Programming: Python, C++, SQL
AI/ML: TensorFlow, scikit-learn, LLMs, RAG, NLP, Agentic AI, Agno
Tools: Git, GitHub, GitLab, Docker
Core: Data Structures & Algorithms, Competitive Programming

Awards and Activities

ODC Champions 2025 - Orange Digital Center (5th in Tunisia, 19th in Africa)	2025
2X TCPC Finalist (13th place)	
Competed in 18+ onsite competitive programming contests	

Organisations

IEEE ENIT SIGHT GROUP, Treasurer	2025 – Present
----------------------------------	----------------

Certificates

- Efficient Large Language Model (LLM) Customization
- CCNA: Introduction to Networks
